2023 COLORADO STATE LEGISLATION CONCERNING ECONOMIC OPPORTUNITY AND POVERTY REDUCTION

State Budget

Despite a voter approved \$400 million income tax rate reduction and a diversion of \$300 million per year for housing, Colorado does expect revenues to come in above the TABOR cap, at least for a couple years.

Late breaking SB303 would use the TABOR surplus for property tax relief for homeowners and school funding. HB1311 would provide one more year of uniform TABOR refunds for all vs a regressively tiered system for TABOR refunds, but only if voters approve SB 303.

Income/expenses

HB1112 would increase the state Earned Income Tax Credit to 38% of the federal EITC for Tax Year 2024 only. It would also permanently change our state Child Tax Credit beginning in Tax Year 2025 to be fully refundable, so the poorest families are not left out. Single parents earning under \$25,000/yr would receive \$1200 per child, those between \$50,000 would receive \$600 per child and those between \$50,000 and \$75,000 would receive \$200 per child.

HB1078 would have added an extra \$35 per week to the checks of those on unemployment insurance who have children.

SB007 increases funding for Adult Education-k-`2 level education for adults and adjusts reporting requirements especially for those working with individuals below 9th grade literacy levels. It also adds "digital literacy to program's scope. It allows community colleges to grant their own high school diploma to their own adult education students.

HB1124 would have renewed enhanced funding for SNAP Employment and Training. Funding pulls down a dollar-for-dollar match. Funding would have allowed enhanced support services and payment of training costs and work-based learning for SNP E & T participants to continue.

HB1118 would have required advance notice of schedules, and additional pay for short notice changes for those working in retail and food service. It would have granted all workers the right to ask for schedule changes without retribution. SB098 requires transparency of how workers are paid, and the right to appeal if workers are dropped without notice of why.

Child Care

HB1091 renews the Child Care Contribution Credit for 3 years. The credit gives donors a 50% income tax credit on donations to organizations that serve children. It also adds in-kind contributions of real property, including below market rent.

Food

SB027 would have added \$3 million per year for 3 years to the

Food Pantry Assistance Program. HB1008 will disallow carryover federal deductions for businesses lunch and switch it to a credit for small retail stores to add capacity to carry fresh and healthy food. HB1087 would allow advanced state grants to pay farmers in advance for food ordered by food programs so crop planning and financing is available at the beginning of the growing season. HB1158 would add \$1 million in funding to help organizations pay the full administrative cost of distributing boxes of food staples to older adults.

Housing

Half of Coloradans pay more than 30% of their income for rent. Almost ¼ pay half of their income for rent. HB1095- adjusts what provisions are permitted in leases. HB1099 allows a tenant to reuse the same credit report for 30 days to apply for different apartments. HB1115 would have restored local government's authority to enact rent control with some exceptions and limits. HB1120 requires mediation prior to eviction actions for renters who identify themselves as receiving cash based public assistance. HB1171 would require just cause- such as nonpayment of rent- to not renew a lease and proceed with an eviction. HB1186 would establish remote/hybrid eviction hearings in which either party could appear remotely.

Under HB1190, when older multifamily rentals go up for sale, local governments could exercise a right of first refusal to buy the unit in order to preserve affordable housing.

Health

HB1126 prevents the reporting of medical debt on credit reports. It also prohibits medical debt collectors from using a threat of medical debt appearing on a credit report in their collection efforts. In fact, they would have to proactively inform people that medical debt could not be added to their credit report. SB093 tackles medical debt earlier in the process, including consumer protections such as capping the allowable interest rate on medical debt at 3%, requiring repayment plans and itemized statements regarding the debt.

SB 002 authorizes the State's Health Care Policy and Finance (HCPF) Department to seek federal authorization to provide Medicaid reimbursement for community health worker services. HB1071 would allow psychologists with additional specialized training to prescribe mental health drugs. SB033 would have prohibited the Medicaid requirement that mental health drugs be pre-authorized, or step therapy of fail first be required prior to prescribing.

HB1215 would limit the charging of facilities fees by hospitals for outpatient services and require that such fees be itemized. HB1225 would remove the hard cap of 12 drugs per year which the Prescription Drug Affordability Board could establish a price cap for.
